PERFECT BLUE SKY - THE BAND STORY 2017

With the uninhibited vibes of 60/70's Psychedelic Classic-Rock, Perfect Blue Sky (SWE/AUS) infuses the listener with imagination and spirit.

Perfect Blue Sky is a highly anticipated collaboration featuring one of the founding members of the Swedish metal act Netherbird Pontus (Pna) Andersson and female solo rock vocalist Jane) Kitto from Australia. Together they formed Perfect Blue Sky in 2014 based out of Stockholm, Sweden.. Although the duo had already established their song/performance partnership in previous band collaborations between 2006 to 2012, both Andersson and Kitto pooled their influences and love of the classic 60/70's Psychedelic era to form a multi-national super group with a cadre of well-known guest-musicians to feature on both their albums and live sets. Their premier line up in 2014 consisted of two legends from Janis Joplin's "Big Brother & The Holding Company" rhythm section, Dave Getz (Drums) and Peter Albin (Bass) along with Aussie keyboardist long distant player/member Danny Oakhill. (Turk Tresize, The Australian Queen Tribute)

The new 2017 album 'The Eye of Tilos' features performances by Jerry Donahue (US Guitarist for the Proclaimers, Fairport Convention, Hellacasters) on bonus track 'PORTRAIT OF LOVE' as well as Big Brother Holding Company drummer Dave Getz 'on HEAD IN THE CLOUDS'. Also newcomer to the line-up is Frenchman Frank Bessard on drums (Joe Satriani Stanley Clarke) as well as keyboardist Danny Oakhill (AUS).

Their shows take their audience on a journey that follows the album themes from start to finish including a brief spoken prelude of each of the songs and always concluding with an extra tribute to the guest musicians appearing in their show. One could suggest a reminiscence of Fleetwood Mac's Lindsay Buckingham and Stevie Nicks reborn in these two primary writers. Both Kitto and Andersson's sound embodies Zeppelin, Wishbone Ash and Pink Floyd influences along with odd timing cues.

Andersson quotes, "Creating this band and music is like coming home to what's real and true. Sometimes you need to take a couple of turns around the world to realize our sky was perfect all along".
